shoulders. The recovery is quick and the stroke rowed is high.

Mr. Ward, for Pennsylvania—The stroke depends largely on the leg drive, even more so than on the catch, the drive of the leg on the finish of the stroke being strong enough to rive the boat such tremendous impetus that there can be a sharp recovery without any check resulting to the boat. The reach is as long as possible, but the grip on the water is slower than that of most of the other crews.

The fight proved to be one of the most-vicious and stubbornly contested battles ever witnessed in this country, and the 1,000 sports who were fortunate enough to see it will not forget the contest for many years to come.

Smith threw away the fight by his carelaseness in not following up his advantage, for several times during the first ten rounds he had Handler grogsy and had be continued to fight his opponent it is safe betting that he would have given Handler his quietus.

In the preliminary bout Al Levy secured the decision over Alex Dunsheath after a fast twelve-round battle.
